

BIM Manager at Metroselskabet

Help shape the future of public transport in a fully integrated BIM/GIS environment.

With multiple infrastructure projects underway, we're looking for an experienced **BIM Manager** to lead innovation, ensure ISO 19650 compliance, and support our ongoing **digital transformation**.

Why Join Us?

At Metroselskabet, we're building tomorrow's metro and light rail systems using cutting-edge digital tools. Our transformation focuses on:

- Smart, user-friendly digital solutions
- Streamlined collaboration across teams and stakeholders
- Efficient, future-proof infrastructure management

You'll be at the heart of this evolution, driving BIM strategy and implementation across the project lifecycle.

Your Role

As BIM Manager, you'll be part of our **Information Management & Technologies (IMT)** team. You'll work closely with colleagues from Digitalization & Information Technologies (DIT), consultants, and contractors.

Key Responsibilities

- **BIM Strategy & Implementation**
Drive BIM integration across all project stages, aligned with business goals.
- **ISO 19650 & OpenBIM**
Define and enforce standards and information requirements.
- **BIM Standards & Tools**
Develop workflows, templates, and tools for project-wide consistency.
- **Project Oversight**
Monitor day-to-day BIM operations and ensure high-quality deliverables.
- **Training & Knowledge Sharing**
Lead workshops and internal sessions to boost BIM maturity across teams.
- **Innovation & Development**
Explore new technologies and suggest improvements to existing systems.

About You

You're a proactive, structured, and solution-oriented BIM expert who thrives in a dynamic environment.

What Sets You Apart?

- Strong communicator who works well across functions and stakeholders
- Independent, yet collaborative, with a practical mindset
- Fluent in English—both written and spoken
- Focused on delivering real-world, impactful solutions

Your Background

- Solid theoretical and practical experience in BIM
- Familiar with ISO 19650 and OpenBIM standards
- Curious, forward-thinking, and eager to shape the digital future of infrastructure

What We Offer

- A key role in one of Denmark's most exciting infrastructure organizations
- Supportive and talented colleagues
- Competitive employment terms
- A chance to truly influence how we build the future of Copenhagen's metro and light rail systems
