

Student Assistant – GIS

Join Metroselskabets Digital Transformation!

Are you eager to be part of one of Denmark's most ambitious digital transformation journeys—where metro and light rail projects are built in a fully integrated BIM/GIS environment? At Metroselskabet, we are shaping the future of sustainable urban transport through cutting-edge digital technologies. As part of our vision, we are developing solutions that are business-driven, user-friendly, and designed to optimize internal processes, improve collaboration with external partners, and ensure the seamless operation of both current and future infrastructure. To help us reach this goal, we are looking for a **student assistant** to support the use and adoption of **GIS and our ArcGIS Enterprise platform** across the organization. The position offers a hands-on opportunity to work with real-world geospatial data in a high-impact environment.

Your Role

You will be part of the Digitalization Information & Technology unit and work closely with our experienced GIS specialists in the Information Management & Technologies team. Your tasks will include:

- Providing support to internal users of ArcGIS Enterprise
- Updating and improving user guides
- Assisting in the configuration of GIS applications
- Performing digitalization or data registration tasks in GIS
- Handling various ad-hoc assignments

Your Profile

We are looking for someone who:

- Has knowledge of GIS principles—experience with ArcGIS is a plus
- Is structured, proactive, and able to work independently
- Enjoys helping others and can communicate clearly and patiently with users of varying technical backgrounds
- Has a positive mindset, strong collaboration skills, and a service-oriented attitude

Qualifications

- You are about to start your master's degree or have at least 1.5 years left in your studies
- You are studying Geography, Geoinformatics, Surveying Science, or a similar field
- You are fluent in English, both spoken and written
- Experience with geospatial data and ArcGIS Enterprise is an advantage

What We Offer

At Metroselskabet you'll become part of a dynamic and professional environment where your contributions matter. We offer:

- An opportunity to gain hands-on experience in one of Denmark's leading public infrastructure organizations
- A role in a fast-paced environment where you'll help shape the future of GIS in large-scale infrastructure projects
- A close-knit and knowledgeable team with strong professional values
- A meaningful job where digital innovation supports better public transport for the entire capital region

Interested? If you have any questions please contact Joe Rasmussen, Team Manager for Information Management and Technologies at +45 7242 4935.

The application deadline is August 17, 2025.
