

Internship at Metroselskabet I/S

Deadline:
31-05-2026

Metroselskabet is currently looking for a motivated intern to join our Process and Quality Management System (PQMS) project within the Engineering unit.

The PQMS project focuses on upgrading Metroselskabet's existing Quality Management System (Value Chain) to ensure it fully captures and reflects all activities and processes across the organization. This is a great opportunity to gain insight into how a large infrastructure organization works with quality, compliance, and process optimization.

As a PQMS Project Assistant, you will be part of the Quality Assurance and Compliance team. Your tasks will include participating in project workshops, supporting the maintenance of the PQMS action plan, contributing to project documentation, assisting units in mapping and capturing processes, and helping create communication materials and presentations.

We are looking for a structured and curious student who is eager to learn and contribute in a collaborative environment. This internship offers hands-on experience with quality management systems and cross-organizational work in a dynamic setting.

Interested? We would love to hear from you.
